Assignment Accepted · Pitching Arc Complete · Execution Arc Begins

CONFIDENTIALITY: OWNER-ONLY document. Internal broker execution playbook.

Prepared for: The DefendableOS Board · in response to engagement award **Prepared by:** dev · Senior Architect · Awarded Exclusive Listing Broker **Date:** 2026-05-24 **Document ID:** DDEED-KICKOFF-DOS-001-v1 **Companion to:** All prior listing-package artifacts (00-10) **Hard copy:** 11_NEXT_STEPS_KICKOFF.pdf

ASSIGNMENT ACCEPTED

The board has awarded dev firm the exclusive listing brokerage assignment for the disposition of DefendableOS · with parallel-track 1031 upleg advisory. We accept the engagement under the terms of 06_REP_AGREEMENT.md plus the 1031 amendment recommended in 10_1031_UPLEG_STRATEGY.md .

This document marks the **transition from PITCHING to EXECUTION**. The 10 prior artifacts (00-10) were the proposal/qualification/strategy package. From here forward · every artifact is execution.

The engagement award itself will be DDEED-anchored on Hedera HCS topic 0.0.10291838 as DDEED-AWARD-DOS-001-v1 within 24 hours of LOU execution. The books-and-records of this engagement start with that anchor.
